

# Rapid Response Telehealth During COVID-19

Practices report these eye-opening statistics since the beginning of the COVID-19 public health crisis:

Drop in patient volume on average  
**60%**

Decrease in revenue  
**55%**

Have been forced to temporarily furlough staff  
**48%**

Permanently laid off staff  
**22%**

Practices need help predicting information and technology needs to optimize care and boost provider and patient adoption.

1. How to deploy and manage staff members that are working remotely
2. How to provide virtual care at-scale
3. How to collect data and payments when everything is virtual

### Telehealth Checklist for the Long Run

What to quickly look for to ensure a fully integrated platform

- Remote patient monitoring
- Digital check-in
- Telehealth
- Collections
- Scheduling
- Device integration

## Qure4u Quick Stats

**2,875**

providers launched in one month

**5.7 million**

patients served

**24/7**

shifts for customer deployment & support

**25%** are Federally Qualified Health Centers (FQHCs), Rural Health Clinics (RHCs) and Community Health Centers (CHCs)

“Qure4u has been working with practices to rapidly shift from onsite visits to 90 to 100% virtual care within days, and sometimes hours. Telehealth has become the new normal in care strategy for doctors, patients and the healthcare workforce as we face unparalleled demands. Virtual visits are an indispensable solution during the COVID-19 crisis and beyond.”

—Dr. Monica Bolbjerg, Chairman, CEO, Founder, qure4u
