

Telehealth Growth

Telehealth has exploded during the COVID-19 pandemic, building upon the incremental growth that has been occurring in the recent years. Digital technologies have become more accepted for both patients and providers, and Telehealth is fulfilling its promise as a significant part of the healthcare system.

Many policy changes have been made during the past few months to significantly expand the use of virtual care, making Telehealth a transformational approach to patient care.

Qure4u Telehealth Visit Volume

Total Number of Telehealth Visits: 122,640 (from 3/30/20 to 7/26/20)

How Telehealth is Transforming Medicine

4,347% Growth

in telehealth claims to private insurers year-over-year

\$90,000 Increase

In Revenue per Month

Since adopting the Qure4u Platform in March 2020, Premier Family Physicians out of Austin, Texas, have seen a \$90,000 monthly increase to their monthly revenue. Furthermore, by taking advantage of Qure4u's Complete Virtual Care Platform, PFP streamlined their registration processes, saving them time, and preventing duplicate processes.

Over \$4,270,000

Telehealth Generated Revenue Since March, 2020

Qure4u has processed more than 122,600 telehealth visits between March and July 2020, enabling our partners to continue providing care, and generating revenue during this unforeseen period. Additionally, our customers are experiencing a patient platform adoption rate of 78% amongst all age demographics.

26% in Saved Revenue

by patients visits via telehealth

Amidst of the pandemic, North Florida Surgeons needed telehealth implemented to continue providing care for their patients and to reduce their potential losses on revenue. After our quick response and implementation, NFS saw, on average, 26% of visits via telehealth, with some days being as high as 50% from the months of March to May 2020,
